

Inviting all stroke affected, family Caregivers and stroke management experts to join our Stroke Support Group on their Mobile / Computer !

“High levels of social support were associated with faster and more extensive recovery of functional status after stroke. Social support may be an important prognostic factor in recovery from stroke. Socially isolated patients may be at particular risk for poor outcome.”
(<https://www.ahajournals.org/doi/10.1161/01.STR.24.1.64>)

Join our Stroke Support Group to:

- Interact with other stroke affected and caregivers on similar journeys as yours.
- To get motivation and hope for recovery, seeing the wonderful efforts of other affected, and provide some inspiration yourselves.
- To attend our offline / online meetups on various aspects of Stroke Recovery elaborated upon by Experts.
- For more details, please see

<https://strokesupport.in/members>
